

Brunata OpTherma substations

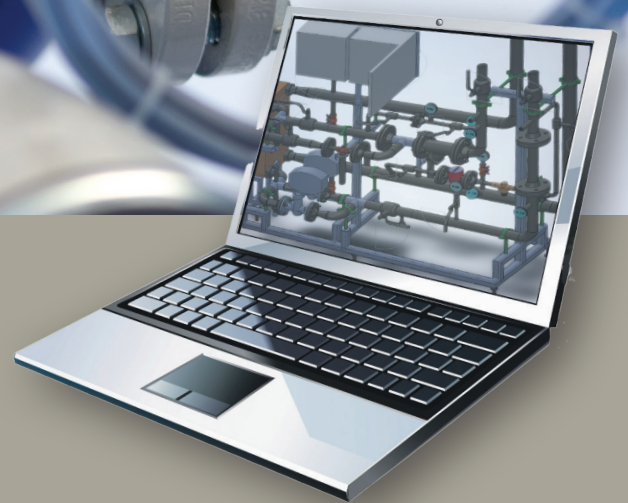

- all the flexibility you need

A Brunata OpTherma substation equals optimum flexibility – available in all sizes as well as custom made to changing operating conditions and special requests. OpTherma is intelligently designed, easy to install and easy to operate.

The substation is delivered complete, function tested and with all electrical connections to minimize installation costs. It is, in short, a Brunata plug & heat solution made with components exclusively from leading manufacturers, ensuring the highest reliability, CE marked and certified according to DS/EN ISO 9001.
