

Customer relationships

At Brunata, we strive to make our customers satisfied with our solutions. We have a strong tradition of stable, long-term customer relationships and cover a broad range of customer groups such as:

- Two-family houses
- Housing associations and cooperatives
- Commercial and industrial properties
- Public buildings and institutions
- Administrators (caretakers, lawyers)
- Consultants (engineers, architects)
- Individual purchasers

“It improves the service we can provide to the tenants and I estimate that it will reduce the administrative cost burden by at least 50 per cent.”

Tim Proctor, Bristol City Council, UK, 2015

“If you are going to change your meters, go for the whole package including electronic meters and access to Brunata Online. This is my best advice.”

Jørgen Hansen, Korsør, DK, 2013

“The service provided by Brunata Sp. Zo.o. (Brunata Poland), with regards to heat accounting and pro-ducts is very accurate, reliable and always on time.”

Katowicka Spoldzielnia, Warsaw, PL, 2008

“As a tenant representative I chose Brunata Zagreb and did the right thing! I get high quality products, affordable prices, and no manipulative fees. And now, I save 45-48% on my heating bill!”

Mihael Jurkovic, Croatia, 2008

Brunata a/s Company Profile

We make a difference

At Brunata, we have almost 100 years' experience of supplying high-technology heating and energy measuring products and services. We are a Danish-owned company dating back to 1917, when heating consumption was first measured in Denmark.

Ever since the company was founded Brunata has been pioneers within accounting services and metering. Continuously, we invest resources in developing our solutions further. Due to these investments, we are in the vanguard technologically. For instance our heat cost allocators contain patented technology that makes them one of the most precise heat cost allocators on the market.

With focus on measuring our customers' consumption, Brunata is top professional in terms of metering resource consumption and energy efficiency in every kind of building. As total supplier, we combine flexible solutions, establish confidence in the results and realise our vision of delivering fair allocation based on individual consumption. Our measurements and accounting services also contribute to greener consumer behaviour through energy savings.

Our solutions cover

- Remote reading of individual consumption through high quality meters
- Individual energy cost allocation and billing
- Online services with presentations of consumption data and archived consumption accounts

500 committed employees at Brunata

We are approximately 500 employees globally. The Brunata employees span a broad range from engineers and technicians to people within R&D, finances, export, IT, SCM, marketing and HR.

A flexible organisation with great commitment to our products and services – and to know, align and fulfil our customers' expectations.

Remote reading gives administrators and residents online access to information about their meters and consumption.

Administrator can also set alarms to monitor unusual consumption of heating and water and unusual humidity in rooms, and receive automatic alerts.

Brunata a/s Company Profile

Brunata Solutions

Allocation accounting

Brunata makes allocation accounting for a broad range of customers within housing associations and cooperatives, commercial and industrial properties, public and private buildings and institutions. Our allocation accounting is flexible and adjusted to each customer's individual needs for services.

Online services

Brunata Online provides access to a range of web-based services, which make it possible to see a variety of information, depending on the user rights. Among other things, monitor individual consumption, report costs, administer residents and see old accounts.

Remote readings

Brunata's radio-based remote reading system is designed to meet various requirements in any type of building. It collects and sends accurate and secure data. Data can be presented for the administrator and the tenants via a tablet, smartphone or PC.

Brunata smart meters

Brunata offers a range of electronic meters:

- Water meters (hot and cold)
- Heat cost allocators
- Energy meters
- Temperature meters
- Humidity meters
- Electricity meters

Installation and maintenance

We install and maintain the meters and provide a range of services within meter control and calibration.

Brunata a/s Company Profile

Good reasons for measuring consumption

Only pay for your own consumption

In many properties, the consumption costs are shared equally between all residents. A household of one person therefore pays as much as one with several people. With individual metering and cost allocation, you only have to pay for your own consumption.

More information, more savings

Research shows that consumption is typically reduced by 10-40% if we can see when and how much energy we use, and how much we pay for it.

With remote reading

- Meters are read without visits in your home
- You only need access to the internet in order to monitor your consumption
- Leaks and other water and energy supply disruptions can be registered and communicated by automatic alerts

Brunata supports climate friendly initiatives by increasing awareness of resource consumption through access to actual metering data.

Brunata encourages energy saving by 10-40% by billing according to actual, individually measured consumption.

Brunata makes it possible to measure energy efficiency and operating profitability of heating systems.

Brunata's mission

Fair allocation through measuring of individual consumption

- Brunata makes fair allocation of costs to heating, water and electricity on the basis of individual metering and correct billing at the agreed time.

Sustainable behaviour through savings

- Brunata makes residents reduce the consumption of water and heating with 10-40%. We do this by measuring consumption daily, visualise the results and advice on good habits.
