

# Brunata's replacement service for water meters

(only in DK)

## Replace your water meters every six years – comply with the legislation and make the administration easier!

If you have signed up for Brunata's replacement service, Brunata will ensure your water meters are replaced in accordance with current legislation. Consequently, the property will always be equipped with approved meters which work perfectly.

### Makes administration easier and complies with the legislation

Meters are replaced every six years and Brunata will manage and implement this, which includes:

- Monitoring when the meters need to be replaced.
- Contact with the individual residents to agree replacement time.
- Supply of new water meters of the same quality and functionality as the old ones.
- Guarantee that the replacement is done in accordance with current legislation, cf. Section 15 of the Danish Safety Technology Authority Circular no.1034 of 17 October 2006. 17.10.2006, § 15

### Service agreements are available to all customers with newly installed water meters

The service agreement is available for newly installed, accessible water meters mounted with a functioning stop valve.

### Payment and prices

Payment for the replacement service is made as a fixed amount once a year for six years. The cost depends on the meter and covers procurement, installation and logistics in connection with the replacement.

### How to proceed

Call us on +44 77 77 70 70 or read more at [www.brunata.com](http://www.brunata.com)
